

Here is the daily schedule for Ci 3.0 Junior Day Camp. The purpose of this schedule is to provide the time framework needed to accomplish our goal for this camp which is to impact young people with the what's of STEM and the why's of biblical apologetics. During this week of camp, campers will see how science & technology integrate with a creation apologetics worldview, preparing them to explain and defend their faith and succeed in their future STEM education and career.
